The appraisal indicates that the staff member has achieved above fully effective results against all performance criteria and indicators as specified in the Performance Agreement and Performance Plan and maintained this in all areas of responsibility throughout the year.
4	Performance significantly above expectations	Performance is significantly higher than the standard expected in the job. The appraisal indicates that the staff member has achieved above fully effective results against more than half of the performance criteria and indicators and fully achieved all others throughout the year.

The review/ assessment indicates that the staff member has achieved below fully effective results against almost all of the performance criteria and indicators as specified in the Performance Agreement and Performance Plan. The staff member has failed to demonstrate the commitment or ability to bring performance up to the level expected in the job despite management efforts to encourage improvement.

ANNEXURE A**LOCAL GOVERNMENT: COMPETENCY FRAMEWORK FOR MAINSTREAM OCCUPATIONS AND CAREER STREAMS****1. Overview of the competency framework**

The competency framework is the enabling mechanism that provides an integration of key human resource processes. It is seen as the backbone of the Talent Management process such as recruitment and selection, individual performance management, succession planning, career path development, training and development and reward and remuneration.

The competency framework standardises a number of processes and make them transparent. It provides a more objective and accurate assessment of individuals enabling the municipality to select and recruit the right people, identify critical development areas, and promote people timeously. This should assist in ensuring that all staff know and are aware of what it takes to succeed in the municipality.

In terms of recruitment and selection the competency framework provides a more objective and accurate assessment of individuals enabling the municipality to select and recruit the right people, in the right job and at the right level of work and competence. It informs the job description, competence profile, interview processes, and any other assessments that may be undertaken during the selection process.

The competency framework assists in standardising the individual performance management process. It makes it more transparent and provides a more objective and accurate basis of assessment. Individuals are measured against the competencies at their job level and can be measured against competencies at the next level to assess their promotion potential and with that stretch performance targets can be set. The competency framework enables individuals to understand their strengths and development areas and to identify the training and development interventions to attain the competencies required for optimal performance.

The competency framework can assist most individuals in developing their careers within the municipality. It outlines the job ladder and competencies for each job within that ladder. Managers can therefore assess an individual's competency in terms of jobs within the career stream and assess their readiness for promotion based on their defined career path. Further, high potential individuals, identified through individual performance management and other assessments, can be developed in line with the competencies in the appropriate career paths, fast tracking their progression up the career ladder. This serves as a retention mechanism to retain key critical and scarce skills.

Despite every effort taken to include all local government occupations some occupational streams may have been omitted or specialised to an extent that the levels of work cannot be defined within a career stream. If such an eventuality arise, a municipality must identify the career stream with the closest match for the relevant occupational stream in respect of the designation, qualifications, competencies, skills and knowledge in any of the prescribed competency frameworks.

2. Application

The application of competencies is key to ensure a common thread through various HR process. To contextualise the application of competencies, key competency frameworks for occupational streams in local government is needed to establish the minimum requirements to be successful in any position occupied by a person serving in a municipality.

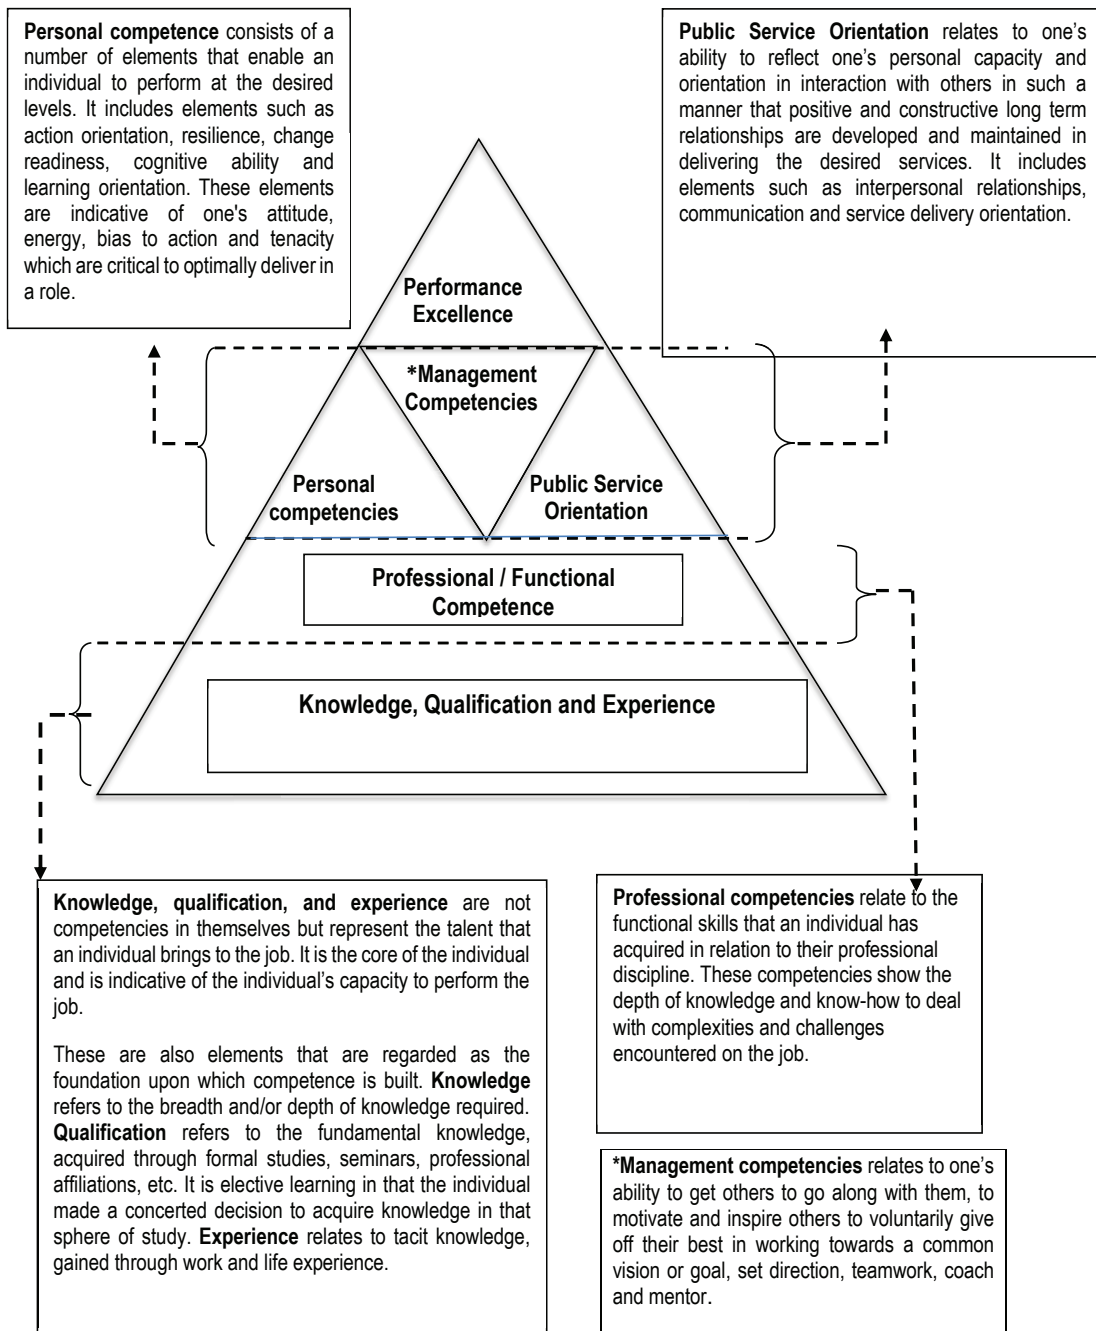

3. Interpretation

Competency frameworks provide an indication of the skills, knowledge and experience that is required for one to be successful in a particular job.

The framework is illustrated in figure 1. In terms of the framework, there are essentially 5 building blocks or competency sets that contribute to an individual's performance in a particular job. These include:

- (a) Knowledge / scope of work, experience and qualifications
- (b) Professional / functional competence (competence in the functional and technical areas of the job)
- (c) Personal competencies
- (d) Public Service Orientation competencies
- (e) Management / Leadership competencies

Figure 1: Application of the Competency Framework

The competency framework recognises that local government municipalities typically exist to focus on key clusters of service delivery as defined in the Constitution of the Republic of South Africa. These are generally defined as Development and Town Planning, Technical Services, Community Services, Corporate Services and Financial Services.

Under each of these clusters, there are key functional areas that support the implementation of service delivery in terms of the local government mandate. To enable a standardised approach to human resource processes around key competency measurement in each functional area, functional specific career/professional streams are defined in support of the professional minimum competence required to execute work in the functional area. These are in essence the competency frameworks. The competency frameworks developed will ensure a clear understanding of the competencies as defined in professional / functional competence, public service orientation competence, personal competence and management competence.

The competency framework will provide an indication of the typical designations, minimum requirements around knowledge, experience and qualifications and the levels of competence as set out against a group of competencies defined per career stream.

Each competency framework consists of competencies as defined for the career stream applicable and then levels of competence that varies between 3 to 5 levels. The levels of competence in some career streams are limited to only 3 levels as the interpretation of job requirements clearly limits the application of such a function or key tasks to only three levels of work. In instances where the career stream in professional occupations commences at entry level professional and proceed to principal / chief professional level, work are normally of a similar nature and difference in complexity, responsibility, application of knowledge and experience may vary and hence it will clearly motivate competence over 5 different levels e.g. Assistant Engineer, Engineer, Senior Engineer, Principal Engineer, Chief Engineer.

The application of the competency levels would describe the minimum level of competence required at a certain level. It describes work in relation to the requirements of the position in a municipality and can therefore be applied in any local, district or metropolitan municipality.

AANHANGSEL A**PLAASLIKE REGERING: BEVOEGDHEIDSRAMWERK VIR HOOFSTROOMBEROEPE
EN LOOPBAANSTROME****1. Oorsig oor die bevoegdheidsraamwerk**

Die bevoegdheidsraamwerk bemoontlik die integrasie van mensehulpbronprosesse. Dit word beskou as die ruggraat van die talentbestuursproses, soos werwing en keuring, individuele prestasiebestuur, opvolgingsbeplanning, loopbaanontwikkeling, opleiding en ontwikkeling en beloning en vergoeding.

Die bevoegdheidsraamwerk standaardiseer 'n aantal prosesse en maak dit deursigtig. Dit verskaf 'n meer objektiewe en akkurate evaluering van individue, wat die munisipaliteit in staat stel om die regte mense te keur en te werf, kritieke ontwikkelingsgebiede te identifiseer en mense betyds te bevorder. Dit behoort van hulp te wees om seker te maak dat alle personeel weet en bewus is van wat benodig word om in die munisipaliteit sukses te behaal.

Ten opsigte van werwing en keuring verskaf die bevoegdheidsraamwerk 'n meer objektiewe en akkurate evaluering van individue wat die munisipaliteit in staat stel om die regte mense in die regte werk en op die regte vlak werk en bevoegdheid te keur en te werf. Dit lê ten grondslag aan die posbeskrywing, bevoegdheidsprofiel, onderhoudsprosesse en enige ander evaluering wat tydens die keuringsproses onderneem word.

Die bevoegdheidsraamwerk help om die individuele prestasiebestuursproses te standaardiseer. Dit maak dit meer deursigtig en verskaf 'n meer objektiewe en akkurate grondslag van evaluering. Individue word teen die bevoegdhede op hul werkvlak gemeet word en teen die bevoegdhede van die volgende vlak om hul bevorderingspotensiaal te evalueer en daarvolgens kan prestasietekens gerek word. Die bevoegdheidsraamwerk stel individue in staat om hul sterkpunte en ontwikkelingsgebiede te verstaan en om die opleiding- en ontwikkelingsingrypings te identifiseer om die bevoegdhede wat nodig is vir optimale prestasie, te verwerf.

Die bevoegdheidsraamwerk kan die meeste individue help om hul loopbaan in die munisipaliteit te ontwikkel. Dit beskryf die werkleer en bevoegdhede vir elke werk op daardie leer in hooftrekke. Bestuurders kan gevolglik 'n individu se bevoegdheid ten opsigte van beroepe in die loopbaanstroom evalueer en vasstel of hulle gereed is vir bevordering op hul gedefinieerde loopbaan. Verder kan individue met groot potensiaal, wat deur individuele prestasiebestuur en ander evalueringe geïdentifiseer is, ontwikkel word in ooreenstemming met die bevoegdhede in die gepaste loopbaan sodat hul vordering op die loopbaanleer kan versnel. Dit dien as 'n behoudmeganisme om kern- kritieke en skaars vaardighede te behou.

Ondanks elke poging wat aangewend is om alle beroepe in plaaslike regering in te sluit, is party beroepsbane moontlik uitgelaat of in so 'n mate gespesialiseer dat die vlekke van werk nie binne 'n loopbaanstroom gedefinieer kan word nie. In so 'n geval moet 'n munisipaliteit die loopbaanstroom identifiseer wat die naaste aan die toepaslike bedryfstroom is ten opsigte van die amp, kwalifikasies, bevoegdhede, vaardighede en kennis in enige van die voorgeskrewe bevoegdheidsraamwerke.

2. Toepassing

Die toepassing van bevoegdhede is noodsaaklik om 'n deurlopende draad deur verskeie mensehulpbronprosesse te verseker. Om konteks te gee aan die toepassing van bevoegdhede is bevoegdheidsraamwerke vir beroepstrome in plaaslike regering nodig om die minimum vereistes vir sukses te stel in enige posisie wat die persoon in die munisipaliteit werk, beklee.

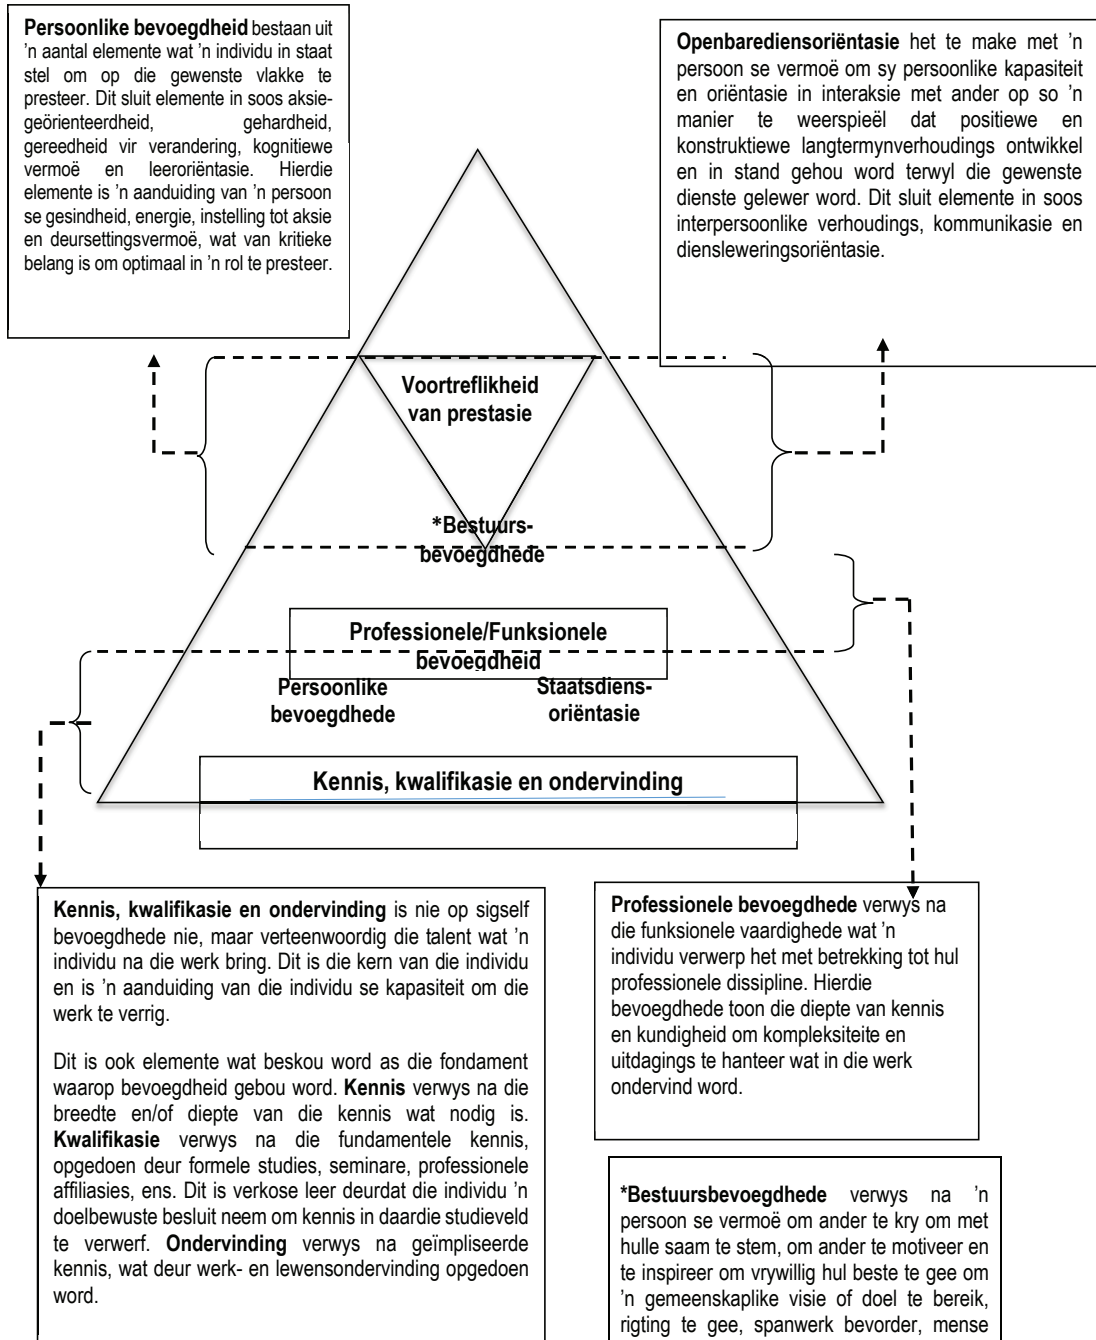

3. Uitleg

Bevoegdheidsraamwerke gee 'n aanduiding van die vaardighede, kennis en ondervinding wat nodig is vir iemand om suksesvol te wees in 'n spesifieke werk.

Die raamwerk word in Figuur 1 geïllustreer. Ingevolge die raamwerk is daar hoofsaaklik vyf boustene of stelle bevoegdhede wat tot 'n individu se prestasie in 'n spesifieke werk bydra. Dit sluit in:

- (a) kennis/werkstrekwydte, ondervinding en kwalifikasies
- (b) professionele/funksionele bevoegdheid (bevoegdheid op die funksionele en tegniese gebiede van die werk)
- (c) persoonlike bevoegdhede
- (d) staatsdiensoriëntasie-bevoegdhede
- (e) bestuurs-/leierskapsbevoegdhede.

Figuur 1: Toepassing van die Bevoegdheidsraamwerk

Die bevoegdheidsraamwerk erken dat munisipaliteite in plaaslike regering kenmerkend op kernklusters van dienslewering fokus, soos gedefinieer in die Grondwet van die Republiek van Suid-Afrika, 1996. Dit word in die algemeen gedefinieer as Ontwikkeling en Stadsbeplanning, Tegnieise Dienste, Gemeenskapsdienste, Korporatiewe Dienste en Finansiële Dienste.

Onder elk van hierdie klusters is daar kern- funksionele gebiede wat die implementering van dienslewering steun ten opsigte van die mandaat van plaaslike regering. Om 'n gestandaardiseerde benadering tot mensehulpbronprosesse vir bevoegdheidsmeting in elke kern- funksionele gebied te bewerkstellig, word funksionele, spesifieke loopbaan- of professionele strome gedefinieer ter ondersteuning van die professionele minimum bevoegdheid wat nodig is om werk in die funksionele gebied uit te voer. Dit is in wese die bevoegdheidsraamwerke. Die bevoegdheidsraamwerke wat ontwikkel word, sal 'n duidelike begrip verseker van die bevoegdheede soos gedefinieer in professionele of funksionele bevoegdheid, staatsdiensoriëntasie-bevoegdheid, persoonlike bevoegdheid en bestuursbevoegdheid.

Die bevoegdheidsraamwerk sal 'n aanduiding gee van die tipiese titels, minimum kennisvereistes, ondervinding en kwalifikasies en die vlakke van bevoegdheid soos uiteengesit teen 'n groep bevoegdheede wat per loopbaanstroom gedefinieer is.

Elke bevoegdheidsraamwerk bestaan uit bevoegdheede soos gedefinieer vir die betrokke loopbaanstroom en dan bevoegdheidsvlakke wat tussen drie tot vyf vlakke wissel. Die vlakke van bevoegdheid in party loopbaanstrome is beperk tot slegs drie vlakke aangesien die vertolking van werkvereistes duidelik die toepassing van so 'n funksie of kerntake tot net drie vlakke van werk beperk. In gevalle waar die loopbaanstroom in professionele beroepe op intreevlakprofessioneel begin en tot hoof- professionele vlak vorder, is werk gewoonlik van 'n soortgelyke aard en kan dit verskil in kompleksiteit, verantwoordelikheid, toepassing van kennis en ondervinding; gevolglik sal dit duidelik bevoegdheid oor vyf verskillende vlakke motiveer, bv. Assistentingenieur, Ingenieur, Senior Ingenieur, Eerste Ingenieur, Hoofingenieur.

Die toepassing van die bevoegdheidsvlakke beskryf die minimum vlak van bevoegdheid wat op 'n sekere vlak nodig is. Dit beskryf werk ten opsigte van die vereistes van die posisie in 'n

munisipaliteit en kan dus in enige plaaslike, distriks- of metropolitaanse munisipaliteit toegepas word.
