Explanatory notes on the statistical tables

General remarks

This Annexure presents details of the main budget, consolidated national and provincial expenditure, government debt and financial guarantees. While government revenues are concentrated at the national government level, expenditure shifted from the national to the provincial sphere after 1994. Equitable share transfers to the nine provinces as a statutory commitment of government began in 1998/99, and the 1998 Budget marked the introduction of the local government equitable share.

Since more than 60 per cent of total expenditure on the main budget comprises transfer payments to other levels of general government, economic and functional classifications of national budget expenditure are not comprehensive. For purposes of analysis, it would be preferable to present economic and functional classifications of the expenditure of *general government*. This requires information on expenditure at all levels of general government and on its financing through revenue, balances brought forward and transfer payments (mainly from the national budget). This information is not readily available for local government, making it impossible to present consolidated general government finances at the time of the national budget. Historical data on general government finances are, however, published by the South African Reserve Bank in its *Quarterly Bulletin* and by Statistics South Africa.

Disbursements of foreign grants and technical assistance, and expenditure of the social security funds are included in the consolidated national and provincial expenditure estimates in Tables 5 and 6. The social security funds include the Unemployment Insurance Fund, the Road Accident Fund and the Compensation funds.

Treatment of foreign grants to the Reconstruction and Development Programme (RDP) Fund

Prior to 1999/00 foreign grants were paid to the National Revenue Fund and expenditure was included in departmental appropriations. From 1999/00 onwards, no foreign grants for RDP-related purposes have been included in the appropriations of national departments. All foreign technical assistance and other RDP-related grants are paid to the RDP Fund account that is separated from the accounts of government. Departments incur expenditure on RDP-related projects from an RDP Grant account, which is cleared with requisitions from the RDP Fund account.

However, in 2002/03 and 2003/04, amounts of R117,5 million and R66,7 million respectively were included in revenue as grants received from international donors. These were contributions towards defraying expenditure on the Burundi peacekeeping mission, appropriated on the budget of the Department of Defence.

Adjustments due to transactions in government stock

As part of the restructuring of government's debt portfolio, bonds are repurchased or switched into new government bonds. In the process, government may make a capital profit, which is a book entry change in the discount on government bonds and is regarded as an extraordinary receipt. As such, capital profit does not represent an actual cash flow and is regarded as a "book profit", recorded as a negative receipt and loan redemption for analysis purposes.

A premium may also be accrued or be payable when restructuring government's debt portfolio. Premiums paid are accounted for as extraordinary payments and premiums received as extraordinary receipts.

Sources of information

The information in Tables 1 to 6 on national and provincial government finances is obtained from the following sources:

- Reports of the Auditor-General on the Appropriation and Miscellaneous Accounts in respect of General Affairs (1974/75 to 1993/94), the Accounts of the National Government (1994/95 to 1999/00), Audited Annual Financial Statements of National Departments (2000/01 to 2002/03) and the Revenue Accounts of the former self-governing territories and TBVC-states.
- Reports of the Auditor-General on the Appropriation Accounts of the nine provinces, Audited Annual Financial Statements of Provincial Departments, as well as draft Financial Statements for some of the provinces.
- Printed Estimates of Revenue and Expenditure for the national and provincial budgets.
- The South African Reserve Bank.
- The Development Bank of Southern Africa.
- Annual statements of the Branches: Inland Revenue and Customs and Excise (previously of the Department of Finance) and of the South African Revenue Service.
- Monthly press releases of the National Treasury, published in terms of Section 32 of the Public Finance Management Act.

In some cases the information on revenue of the former self-governing territories, TBVC-states and the expenditure of the new provinces in Tables 1 to 6 was either preliminary or a budget estimate. Where data were incomplete, collections of a particular tax have been adjusted by the average growth in collections of that tax in the rest of the self-governing territories and TBVC-states. Hence the information in Tables 1 to 6 cannot be regarded as actual and audited.

Revenue, expenditure, budget deficit and financing (Table 1)

Table 1 summarises the main budget balances since 1997/98 and medium term estimates to 2006/07. To be in line with the new Economic Reporting Format, the revenue classification has been amended to show *financial transactions in assets and liabilities* separately, which was included in non-tax current revenue in the past.

Repayments of loans and advances, which were previously shown as negative expenditure, have been reclassified as revenue. Given that the same amount is added to both revenue and expenditure, the national budget deficit is unaffected.

The classification of expenditure has also been amended in line with the New Economic Reporting Format. Appropriations by vote are now divided into current payments, transfers and subsidies, and payments for capital assets. Both current and capital transfers are included in transfers and subsidies, in line with the requirements of the new format. Expenditure for the years 1997/98 to 1999/00 has been reclassified to be in line with the new classification principles. However, payments for capital assets prior to 1999/00 are not strictly comparable with the numbers for 2000/01 onwards, due to the changes in classification rules. These new rules are explained in detail in the *2004 Estimates of National Expenditure*.

The size of the deficit figures presented in this table differ from those presented in budgets prior to 1995/96, as a number of items that were previously regarded as “below-the-line” expenditure have been included in total expenditure. In addition, revaluations of foreign loan obligations are now excluded from expenditure, in keeping with international practice.

Under loan redemptions and financing, *short-term loans* include the net result of transactions in treasury bills. *Long-term loans* include all transactions in government bonds (i.e. new loan issues, repayments on maturity, consolidations, repurchases and switches).

Loans issued for extraordinary purposes represent the settlement of extraordinary payments by means of government bonds issues. It excludes extraordinary payments in cash.

Prior to the *1998 Budget Review*, transfers from the Strategic Fuel Fund and the National Supplies Procurement Fund, as well as proceeds from the sale and restructuring of state assets, were treated as financing items. These, together with extraordinary payments unrelated to expenditure, are now shown below the deficit and before financing. The reclassification does not affect the budget deficit.

Transfers between the former State Revenue Account, the Stabilisation Account and the Tax Reserve Account are shown in Table 1 as part of the changes in cash and other balances.

Main budget revenue (Tables 2 and 3)

Table 2 presents a summary of revenue and the details are set out in Table 3. Main budget revenue collections are recorded on an adjusted cash basis (cash book – revenue recorded as it is received in the ledgers of SARS). Tax revenue is classified according to standard international categories and departmental revenue according to the requirements of the new Economic Reporting Format.

Certain receipts into the National Revenue Fund are not regarded as revenue. These include proceeds from the sale of state assets, transfers from the IMF Deposit Account, transfers from the Tax Reserve Account, adjustments due to transactions in government stock and proceeds from the sales of fuel stocks.

The historical data presented in Table 3 have been reclassified to be in line with the new Economic Reporting Format. However, a large portion of the data cannot be reclassified, as departments captured these revenue transactions within their ledgers as miscellaneous revenue. These amounts are therefore reported as unspecified revenue.

Medium-term expenditure estimates by votes (Table 4)

Table 4 contains estimates of expenditure on national budget votes for the period 1999/00 to 2006/07. In 2003/04, amounts appropriated in the Main Budget and the Adjustments Budget as well as preliminary estimates of spending on each vote are shown. In all years prior to 2000/01, capital works undertaken by the Department of Public Works on behalf of other departments are distributed to these votes to give estimated total expenditure for each of the departments. These capital works amounts are now included in the individual departments appropriations.

The historical numbers have been adjusted for function shifts between various departments and therefore the detail amounts of some departments might differ from financial statements produced by those departments. However, total expenditure is not influenced by these changes.

Consolidated national and provincial budgets (Tables 5 and 6)

Tables 5 and 6 show the economic and functional classification of payments for consolidated national and provincial government and the social security funds. The national expenditure figures are for the 2004 Budget. In the provinces, however, expenditure estimates are preliminary, as their budgets are tabled after the National Budget. Provincial estimates are based on preliminary budget statements provided by the provinces and are subject to change before being tabled in the provincial legislature.

National Treasury has embarked on a project to reform the classification system used in the budget documentation of national and provincial governments. The aim of the reform is to bring reporting in line with international best practice, thereby improving transparency and accountability. For this purpose a new Economic Reporting Format and standard chart of accounts have been developed, that is in line with international reporting requirements. A detailed explanation of this

new Economic Reporting Format can be found in the introduction to the *2004 Estimates of National Expenditure (ENE)* published by the National Treasury.

During the conversion from the old to the new economic format and the reclassification of historical data, a few misclassifications have been identified and rectified. This results in the data in Tables 5 and 6 not being strictly comparable to the same tables published in previous budgets. Some of the major amendments to the economic and functional classifications can be summarised as follows:

- Payments for training of new police officials within the Department of Safety and Security have been included with *education* expenditure in line with the requirements of the functional classification.
- The Municipal Infrastructure Grant (MIG) to local government, in the Department of Provincial and Local Government previously classified as part of *general government services and unallocable expenditure* has been allocated to specific functions, influencing mainly *water schemes and related services, transport and communication, fuel and energy and housing*.
- Regional Service Council (RSC) levies payable by departments and municipal rates and taxes payable by the Department of Public Works are compulsory fees due to local government. These amounts were previously classified as *goods and services* in the economic table but are now classified as *transfers to municipalities*, in line with international classification standards.
- A number of transfers to extra-budgetary institutions were previously erroneously included as *transfers to households and non-profit institutions*. These classifications have been amended to be in line with the latest version of the schedules of public entities listed in the *Public Finance Management Act* and are now included in *transfers to departmental agencies and accounts*.
- The Department of Public Works previously classified lease payments for some government buildings as capital expenditure. This reclassification results in a decrease in capital expenditure in the historical data as this is now included in *current payments* as part of *goods and services*.
- Small amounts spent on current maintenance previously classified as *capital expenditure* is now correctly reflected as *current payments*.
- Transfers made to the South African Rail Commuter Corporation were erroneously classified as a *transfer to departmental agencies and accounts*. This was rectified and is now included as *transfers to public corporations*.

Total debt of Government (Table 7)

Table 7 shows the major components of government debt. Total net government loan debt is calculated taking into account the cash balances of the National Revenue Fund. Realised losses on the Gold and Foreign Exchange Contingency Reserve Account is also disclosed. The projections for 2003/04 to 2006/07 are based on national budget data.

Financial guarantees: Amounts drawn on Government guarantees (Table 8)

The national government furnishes guarantees to various institutions. These guarantees will realise as liabilities to the state only if these institutions are unable to meet their commitments. It is not possible to anticipate the portion of these guarantees that will realise as liabilities to the national government, and they are therefore disclosed as *contingent liabilities* in Government's *Statement of Liabilities and Financially Related Assets*. Amounts drawn in respect of guarantees and interest on these amounts, if guaranteed, are disclosed.

1) This table summarises revenue, expenditure and the main budget balance since 1997/98. As available data are incomplete, the estimates are not fully consistent with other sources, such as the government finance statistics series of the Reserve Bank.

2) Sales of capital assets. Transfers from the National Supplies Procurement Fund and Strategic Fuel Fund are excluded.

3) Financial transactions in assets and liabilities includes recovery of loans and advances.

4) Expenditure for 1997/98 to 1999/00 has been reclassified to be in line with the new economic reporting format.

5) Excluding discount on the sales of new government stock, premium on debt portfolio restructuring and revaluation of foreign loan repayments. Including management costs.

6) The provincial equitable share was introduced in 1998/99. Prior to this the provincial share was included in voted expenditure as a transfer to provinces.

7) Includes standing appropriations comprising realised guarantee liabilities, subscriptions payments to IDA and IBRD, as well as valuation adjustment payments to the IMF and other statutory appropriations such as judges salaries and skills development funds.

8) Includes compensation of employees, payments for goods and services, interest on overdue accounts, rent on land and financial transactions in assets and liabilities.

9) Includes current and capital transfers and subsidies to business, households, foreign countries and other levels and funds of general government.

10) Includes acquisition and own account construction, construction of new assets and the cost of upgrading, improvements and extensions to existing capital assets.

11) Includes premiums received on destination bonds in switch auctions, previously recorded as revenue.

12) Includes proceeds from the sales of state assets and strategic supplies. Also included is "book profit" on domestic government bond buy-backs and source bonds issued in switch actions, previously included as non-tax revenue. This does not represent actual cash receipts and is therefore excluded from revenue.

Receipts not regarded as revenue	14) 1 445,6	559,9	602,0	3 772,0	333,6	959,0	1 221,5

1) Figures prior to 1994/95 (representing the former State Revenue Account) are adjusted to be comparable to the current National Revenue Fund (see introductory notes to this statistical annexure). Figures prior to 1995/96 include collections by the former TBVC states and self-governing territories.

2) Figures prior to 1999/00 exclude receipts from mining companies. Figures from 1999/00 onwards include receipts from all companies.

3) Including interest on overdue tax, non-resident shareholders' tax, non-residents' tax on interest and tax on undistributed profits.

4) Levy on payroll dedicated to skills development.

5) The 1998/99 and the 1999/00 figures include receipts of the demutualisation charge amounting to R278,5 million and R577,0 million respectively, which were not included in the budget estimates.

6) Including sales duty, which was replaced by a general sales tax in July 1978. The value added tax replaced the general sales tax in September 1991.

7) Including the former fuel levy directed to Regional Services Councils and the levy allocated to the National Road Fund for the period 1983/84 to 1986/87.

8) Including various levies, mining leases and ownership, cinematographic tax and other special levies imposed since 1974/75, as well as receipts of the Universal Service Fund since 1998/99 and the Human resources fund for 1998/99 and 1999/00.

9) Including diamond export duties, miscellaneous customs and excise income, as well as ordinary levy collections.

10) Revenue received by SARS in respect of taxation which could not be allocated to specific revenue types. Previously shown as part of other non-tax revenue.

11) Premiums received on destination bonds on switch options, previously included in revenue, are now reflected under extraordinary receipts.

12) Domestic and foreign grants, transferred from the RDP Fund to finance RDP-related expenditure, and grants received from other spheres of government.

13) South African Custom Union payments (excluding payments to the former TBVC states and self-governing territories). Payments to the Central Revenue Fund of Namibia up to independence are included.

14) Sales of strategic fuel stocks, proceeds from sales of state assets and certain other receipts are, by law, paid into the National Revenue Fund, but are not regarded as revenue.

Less: SACU payments		-8 396,1	-8 204,8	-8 259,4	-9 722,7	17,7%	-13 327,8
Transactions in assets and liabilities		155,7	81,4	365,6	570,0	55,9%	646,2
Receipts not regarded as revenue	14)	2 984,2	4 159,1	8 168,5	889,5	-89,1%	2 742,1

1) Figures prior to 1994/95 (representing the former State Revenue Account) are adjusted to be comparable to the current National Revenue Fund (see introductory notes to this statistical annexure). Figures prior to 1995/96 include collections by the former TBVC states and self-governing territories.

2) Figures prior to 1999/00 exclude receipts from mining companies. Figures from 1999/00 onwards include receipts from all companies.

3) Including interest on overdue tax, non-resident shareholders' tax, non-residents' tax on interest and tax on undistributed profits.

4) Levy on payroll dedicated to skills development.

5) The 1998/99 and the 1999/00 figures include receipts of the demutualisation charge amounting to R278,5 million and R577,0 million respectively, which were not included in the budget estimates.

6) Including sales duty, which was replaced by a general sales tax in July 1978. The value added tax replaced the general sales tax in September 1991.

7) Including the former fuel levy directed to Regional Services Councils and the levy allocated to the National Road Fund for the period 1983/84 to 1986/87

208,3%	0,8%	2 566,5	-6,4%	120,9	-95,3%	14) Receipts not regarded as revenue

8) Including various levies, mining leases and ownership, cinematographic tax and other special levies imposed since 1974/75, as well as receipts of the Universal Service Fund since 1998/99 and the Human resources fund for 1998/99 and 1999/00.

9) Including diamond export duties, miscellaneous customs and excise income, as well as ordinary levy collections.

10) Revenue received by SARS in respect of taxation which could not be allocated to specific revenue types. Previously shown as part of other non-tax revenue.

11) Premiums received on destination bonds on switch options, previously included in revenue, are now reflected under extraordinary receipts.

12) Domestic and foreign grants, transferred from the RDP Fund to finance RDP-related expenditure, and grants received from other spheres of government

13) South African Custom Union payments (excluding payments to the former TBVC states and self-governing territories). Payments to the Central Revenue Fund of Namibia up to independence are included.

14) Sales of strategic fuel stocks, proceeds from sales of state assets and certain other receipts are, by law, paid into the National Revenue Fund, but are not regarded as revenue.

1) Excluding ad valorem excise duties and the general fuel levy.

2) Specific excise duties on petrol, distillate fuel, residual fuel and base oil.

3) Excise duties which are collected by the BLNS countries, former self-governing territories and TBVC states.

4) Revenue received by SARS in respect of taxation which could not be allocated to specific revenue types. Previously shown as part of other non-tax revenue.

1) These figures were estimated by the National Treasury and may differ from data published by Statistics SA and the SARB. The numbers in this table are not strictly comparable to those published in previous years due to the reclassification of expenditure items for previous years. Data for the history years have been adjusted accordingly.

1) These figures were estimated by the National Treasury and may differ from data published by Statistics South Africa. The numbers in this table is not strictly comparable to those published in previous years due to the allocation of some of the unallocable expenditure for previous years. Data for the history years has been adjusted accordingly.

2) Mainly general administration, cost of raising loans and unallocatable capital expenditure.

4) Valued at appropriate foreign exchange rates up to 31 March 2003 as at the end of each period. Forward estimates are based on exchange rates prevailing at 31 December 2003, projected to depreciate in line with inflation differentials.

5) Forward cover losses on the Gold and Foreign Exchange Contingency Reserve Account on 31 March 2004 represents an estimated balance on the account. The issue of R 14 billion of nil coupon bonds to the SARB to defray realised losses is reflected in the balances of subsequent years. No provision for any profits or losses on this account has been made for subsequent years.
