## Jutastat Internet and Intranet Product Platforms

Internet and Intranet e-publications are available as part of Juta's online offering to customers (Jutastat e-publications as they are commonly known). Each delivery platform has its own features and benefits.

The Internet platform offers two options to access content: username and password access, or Internet Protocol authenticated access (IP-authentication). Username and password access is typically suited to an individual subscriber, while IP-authentication is better suited to organisations with multiple users.

Organisations with limited Internet bandwidth capacity or those that would prefer an internally-hosted product offering will find Juta's Intranet solution the favoured platform option.

For further details regarding these and other Jutastat e-publications please contact a Business Consultant (details overleaf).
