

Project Manager

Support Services

Location: Claremont

Reporting to: Projects and Operations Manager

Grade: C5

This role is perfect for an experienced Project Manager who is keen to be part of an energetic team, working in a fast-paced environment. You will be supported by a set of highly skilled people and report to the Projects and Operations Manager. The sense of impact and reward will be substantial as you will play a key part in the company's digital transformation journey.

What you will do

The Project Manager will act as one of the key lynchpins for the company. You will develop a Project Management methodology and drive Project Governance, combining product vision from the Product Owners with product development, content conversion and project execution.

Specific responsibilities are:

- Project Governance
- Project prioritization
- Project management
- Analysis and design
- Quality assurance and testing
- Support and maintenance
- Administration

What you need to be great at:

- Innovative thinking
- Making decisions using sound judgment
- Problem solving aptitude
- Outstanding analytical thinking capability
- Resilient and gets things done
- Adaptable to change
- Capacity for hard work in a fast-paced environment
- Effective communicator and influencer
- Teamwork

What we are looking for:

- Project Management or Business Analyst Qualification
- 3 to 7 years' experience in project management or quality assurance in a software development environment
- An executor with a proven track record of running large tech projects

Other nice to haves:

- Information technology or information systems qualification
- 2 to 3 years Business Analysis experience

Interested staff to submit a brief resume to lmclachlan@juta.co.za no later than 6 July 2018
