About this Publication:

Law and Poverty: Perspectives from South Africa and Beyond is a collection of essays by leading South African and international experts, as well as emerging young scholars. The collection focuses on key theoretical and strategic questions concerning the relationship between law and systemic poverty. The essays were first presented at a colloquium on Law and Poverty organised by the Stellenbosch Law Faculty, which took place from 29 to 31 May 2011. The range and richness of the essays illuminate the multifaceted nature and causes of poverty, as well as the possibility and limits of law in responding to the social injustice which poverty represents. By engaging with these questions, the book aims to deepen critical reflection and debate on law's ability to respond effectively to social and economic marginalisation.
