About this Publication:

Cost and Management Accounting is a comprehensive resource intended for courses which cover the fundamentals of this subject. The content is aligned to the latest curriculum of the Chartered Institute of Management Accountants (CIMA), and deals with the basic concepts and techniques for the identification and control of costs, as well as general cost management. Cost and Management Accounting has a strong southern African perspective and covers current issues on each topic.

Written by a group of expert subject specialists using accessible language and engaging formats, this student-friendly text is a must-have resource for students at universities and universities of technology, as well as for those following MBA courses and other management accounting courses.

Contents Include:

1. The context of management accounting
2. Basic cost accounting, cost classification, behaviour and
3. Inventory management and control
4. Labour cost and control
