About this Publication:

The Law of Landlord and Tenant revisits the law of landlord and tenant in light of the constitutional context to determine how this area of law has developed, especially since the pre-1994 era, to further constitutional goals. The purpose of the volume is to place legislation, case law, academic analysis and policy considerations in the context of the constitutional framework within which private law rights are acquired, exercised and transferred or lost, but also add to existing academic commentary some sections of foreign law where the comparison might provide insight to the South African landlord-tenant context.
