About this Publication:

No business exists in a vacuum – it is impacted on by a constantly evolving world which presents new challenges and opportunities every day. To cope with these, a business should be proactive and adaptive, not just at an operational level, but at a functional and strategic level as well. Business Management: A Contemporary Approach focuses specifically on the functions of the business organisation and how to respond to changes in the micro- and macro-environment, and in the market.

This title starts with introducing the field of business management, followed by general management principles applicable to any business manager. The book goes on to cover the various functions of the business organisation: financial management; information management; credit management; marketing management; operations management; public relations; human resource management; and purchasing management in supply chain management. It also covers contemporary issues like corporate citizenship and trends and changes in internationalisation. The third edition of Business Management: A Contemporary Approach includes new features and updated content, such as:

- New case studies applying theory to practical situations
- Experiential exercises and multiple-choice questions
- Up-to-date theory on the functions of the business organisation
- In-depth analysis of the relevant issues of corporate citizenship, globalisation and international trade.
