About this Publication:

In this edition of *Occupational Health and Safety Management*, the authors aim at validating the concept of safety ownership and the application of safety excellence.

The book highlights the roles and functions of a safety practitioner and focuses on the legal requirements and applications of providing a healthy and safe workplace. The authors discuss hazard identification, at-risk behaviour, and behaviour-based safety and risk assessment, through a health and safety management approach.

Contents Include:

- Chapter 1: Promoting a safety culture in the workplace – *Francois van Loggerenberg*
- Chapter 2: Personal ownership of safety as cornerstone for safety excellence – *Elsjebe Mostert*
- Chapter 3: Analyse and assess the importance of management's role in safety – *Hester Nienaber*
- Chapter 4: Characteristics and qualities of a successful safety practitioner – *Francois van Loggerenberg*
- Chapter 5: Legal requirements for office safety management – *Francois van Loggerenberg*
- Chapter 6: Hazards and safety committees in the working environment – *Francois van Loggerenberg*
- Chapter 7: At-risk behaviours in the working environment – *Francois van Loggerenberg*
- Chapter 8: Elements that contribute to unsafe practices in the working environment and how to prevent them – *Francois van Loggerenberg*
- Chapter 9: Necessity, processes and implementation of risk assessment – *Francois van Loggerenberg*
- Chapter 10: Evaluation tools for safety and risk analysis – *Elsjebe Mostert*

Of Interest and Benefit to:
